EXPERIENCE

SOFTWARE ENGINEER - FRONT-END
Current
Aetna

Created and maintain reusable components for the web component library and build new features for the Aetna web platform such as typeahead search. Provide engineering support to the design team.

SENIOR FRONT-END DEVELOPER
Oct 2015 - Aug 2017
Kalkomey Enterprises

Introduced the use of living styleguides along with the SMACSS methodology and BEM naming convention to all new projects for more rapid development and consistency across products.

Created prototypes using Jekyll with tight deadlines to allow new products to be demoed to potential clients.

Led the front-end development on three major projects using Angular, TypeScript, Webpack, Node/Express and Ruby on Rails.

SOFTWARE ENGINEER II - FRONT-END
April 2014 - Aug 2015
Join'em LLC

First front-end engineer hire at start-up company part of a small, close-knit engineering team. Took a concept and built a mobile-first/ RESTful API driven single page web application using AngularJS with a living styleguide.

FRONT-END DEVELOPER
Aug 2013 - April 2014
Apollo Interactive

Built new web pages, responsive email templates, fixed bugs, and added new features for existing client websites.

WEB DEVELOPER
March 2013 - Aug 2013
Online Performance Marketing

Built/designed custom, responsive WordPress themes for new clients from high-fidelity prototype to fully launched websites.
