EXPERIENCE

AETNA / SENIOR SOFTWARE ENGINEER - FRONT-END
Feb 2018 - Current, Remote

Build reusable + accessible UI components for the component library. Build features that interact with various API's such as provider search, claim payment, spending details, and integrated support for dental policies. Provide engineering support to the product, design, and content teams.

KALKOMEY / SENIOR FRONT-END DEVELOPER
Oct 2015 - Aug 2017, Dallas + Austin (remote)

Introduced the use of living styleguides along with the SMACSS methodology and BEM naming convention to all new projects for more rapid development and consistency across products.

Built the UI for the internal content/learning management system. Led the front-end developement for the customizable storefront that allows state agencies to sell state licensing products.

JOIN'EM / SOFTWARE ENGINEER II - FRONT-END
April 2014 - Aug 2015, Dallas + remote

First front-end engineer hire at start-up company part of a small, close-knit engineering team. Took a concept and built a mobile-first/RESTful API driven single page web application using AngularJS with a living styleguide.

APOLLO INTERACTIVE / FRONT-END DEVELOPER
Aug 2013 - April 2014, Dallas

Built new web pages, responsive email templates, fixed bugs, and added new features for existing client websites.

ONLINE PERFORMANCE MARKETING / WEB DEVELOPER
March 2013 - Aug 2013, Richardson

Built/designed custom, responsive WordPress themes (PHP) for new clients from high-fidelity prototype to fully launched websites.

UT-DALLAS / DESIGNER+DEVELOPER
Nov 2011 - May 2013, Richardson

I maintained the content on the recreational sports dept website. Developed the department site in May 2012. Designed posters, flyers, web slides, and graphics for other print material.
