CINDY JUAREZ

I am a front-end engineer in Austin, Texas

www.sceendy.com

I build modern web apps that are functional, efficient, and thoughtfully designed.

EXPERIENCE

Senior Front-end Developer @ Kalkomey
October '15 - August '17

Worked on courseware, interactive learning objects, and data management applications as an integral part of cross-functional agile scrum teams.

Introduced the use of dynamic styleguides and SMACSS/BEM methodologies to all new projects for more rapid development and consistency across products. Created prototypes with tight deadlines to allow new products to be demoed to potential clients. Led the front-end development on three major projects:

Foundry - an internal content/learning management system
Kalkomey Outdoor Shop - an e-commerece web application
AMS - a product suite composed of tools and services for clients.

Software Engineer II - Front-end @ Join'em
April '14 - August '15

First front-end engineer hire at start-up company part of a small, close-knit engineering team. Took a concept and built a mobile-first/RESTful API driven single page web application. Created design patterns and reusable web components to rapidly build new features. Helped company secure over $6M in funding from investors including Priceline and Facebook executives.

Front-end Developer @ Apollo Interactive
August '13 - April '14

Built new web pages, responsive email templates, fixed bugs, and added new features for existing client websites. Helped improve development process and integrate new tools/frameworks. Clients included Einstein Bros, Visionworks, Wingstop, Curves, and Extraco Banks.

Web Developer @ Online Performance Marketing
March '13 - August '13

Built custom responsive WordPress themes for new clients from high-fidelity prototype to fully launched websites. Maintained existing client websites, improved responsiveness on existing sites, and refactored code to improve performance.
